

## Don't Feed Wildlife.

Wild animals that lose their fear of humans attract larger predators into neighborhoods. When human safety is threatened, the story ends badly for the wild animal. Remember:

- Don't leave food outside to lure in javelina or rabbits;
- Use bird feeders rather than scattering seed on the ground;
- Discourage wild animals from "hanging around" your yard with loud noises or a spray of water;
- Do grow native plants to encourage a healthy diet for wildlife.

Please, act responsibly and help  
"Keep Wildlife Wild."
